## **ENVIRONMENTAL POLICY**

*The executive of the Clerprem S.p.A. and CP International S.p.A. work in Carrè, hereafter Organization, deems environmental protection as a company value. The Organization has implemented an environmental management system as per international standard ISO 14001 to ensure implementation of all activities in an environmental correct manner as well as actuation of environmental improvement plans.*

*The purpose and field of application of the Environmental Management System is the design, the management and the production of seat systems, lumbar support, armrests, metal structures, consoles and pads in flexible and integral polyurethane for cars and coaches by means of processes of foaming and assembly.*

*The Organizations task for environmental protection aims for:*

- *prevent polluting and look for continuous improving of policies, programs and environmental performance, by planning goals and implementing the corresponding plans;*
- *ensure legal compliance;*
- *measure and document environmental results, by regularly checking and evaluating compliance to policy, aims and binding requirements as well as to the environmental management system suitability, informing the Organization periodically;*
- *evaluate aspects and limiting the environmental impacts of its activities, related in particular to the efficient use of energy resources and renewable energy, for the purpose of decarbonisation;*
- *evaluate aspects and limiting the environmental impacts of its activities, related in particular to the efficient use of raw materials, chemical products, the water consumption and the discharges and soil quality, the control of atmospheric emissions, the greenhouse gas and noise emissions, the correct management and reduce production of hazardous e non-hazardous waste, giving priority to reuse and recycling processes;*
- *limit the impacts of its activities on animals, biodiversity, land use and deforestation;*
- *develop plans and keep them active to face and manage emergency in collaboration with the appropriate services and the competent authorities;*
- *improve staff training and environmental awareness, providing staff with appropriate means and information;*
- *promote the implementation of this principles to suppliers and contractors;*
- *promote and make available the environmental policy to partners, stakeholders and public.*
